Annual School Plan 2025/26

Major Concern 1: To nurture students with in-depth learning skills for life-long learning in the era of AI

Briefly list the feedback and follow-up actions from the previous school year:

- The previous school year demonstrated a notable enhancement in students' academic performance and overall engagement. The strategies implemented to stretch students' potential across different abilities yielded positive results as evident in the improved academic performance and learning atmosphere.
- To further help students strive for excellence and be more proactive, it is important to integrate AI into teaching and learning practices to develop students as a lifelong learner in the era of AI.
- While academic performance improved, some students still struggled with foundation of learning habits and skills. This gap points to the need of more targeted interventions and personalized learning plans and methods to ensure all students can thrive.
- The 3-tier framework is effective in promoting STEAM education. Yet, in an ever-changing world, it is important to get our students prepared to bring knowledge and skills to solve problems, and a more interdisciplinary learning approach and enhancement of arts components are to be done to further enrich students' learning experience and core STEAM-related skills.

Intended Outcome / Target (1):

| Target | Implementation Strategy | Success Criterion | Method of | Time | Responsible | Resource |
|-------------------------------|--|------------------------|---------------|-------|----------------|--------------|
| | | | Evaluation | Scale | Person | Required |

| | and care in their | | |
| | learning process | | |

Major Concern 2 To cultivate a supportive and growth-focused learning environment that nurtures students' well-being

Briefly list the feedback and follow-up actions from the previous school year:

- Students actively participated in activities and programs promoting the Christian value of "empathy", demonstrating a deeper understanding of this principle. However, feedback indicated that the school should continue to enhance students' perseverance. To better integrate Christian value and nurture perseverance, a more structured support system will be implemented.
- The measures to help students strengthen their sense of national identity and resist societal temptations and unhealthy influences were commendable. Nonetheless, to empower students to embrace challenges more effectively and develop a stronger sense of self-efficacy, the school will focus on enhancing overall well-being of students. This will involve fostering a supportive and growth-oriented learning environment where students feel valued and empowered. Additionally, a variety of diverse programs will be introduced to promote a healthy lifestyle, incorporating physical and aesthetic activities.

Intended Outcome / Target (1):

| Target | Implementation Strategy | Success Criterion | Method of | Time | Responsible | Resource |
|------------------------|--|--------------------------|-------------|-------|-------------|----------|
